

## Recycled silver declaration

Since 1999, LEGOR GROUP operates according to ISO 9001 standard. The Company mission is to continuously enhance customer satisfaction becoming the leading partner of trust in supplying alloys for goldsmith and silversmith, and relating technologies and know-how.

Legor Group has been sensitive to environment issues and therefore aiming to use environmental friendly silver.

In particular:

- only 99,99% silver (double refined) is used in our process, keeping impurities under control.
- our suppliers of raw silver are qualified in compliance with our Quality Management System, so they have issued following documents:
  - Declaration that the silver supplied is a result of refining process and therefore it does not come from mines.
  - Declaration that no child-labor is being used in their production.

In our commitment to continual improvement for quality and environmental performance we can declare that only recycled silver is used in our production processes.
